

***Press release***

*Astana, December 27, 2023*

**KazTransOil JSC commissioned two new oil storage tanks with a total volume of 40 thousand m<sup>3</sup>**

At the B. Dzhumagaliev main oil pumping station of Zhezkazgan oil pipeline department of KazTransOil JSC put into operation two newly built oil storage tanks with pontoon No. 5 and No. 6. The capacity of each of them is 20 thousand m<sup>3</sup>. Thus, the total capacity of the station’s tank farm today is 120 thousand m<sup>3</sup>.

Previously, the second – final stage of work on connecting the tanks to the process pipeline was completed. The first stage of the process pipeline connection process was implemented in October 2023.

The new tanks are equipped with a full set of equipment necessary for the safe and uninterrupted operation of B. Dzhumagalieva main oil pumping.

B. Dzhumagaliev main oil pumping station of Zhezkazgan oil pipeline department of KazTransOil JSC is located at the 1,108th kilometer of the Pavlodar - Shymkent main oil pipeline and is the end point of the Kumkol - Karakoin main oil pipeline.

***For reference:***
