22. The corporate governance system of the fund and organizations is a set of processes that ensure management and control over the activities of the fund and organizations, as well as a system of relationships between the executive body, the Board of Directors, shareholders and stakeholders, and is aimed at the growth of long-term value and sustainable development. The Board of Directors periodically considers issues of improving efficiency of the above system of relationships. - 1) shareholders (participants);
- 2) the Board of Directors (Supervisory Board);

The fund's position on certain issues is communicated through the fund's representatives on the company's Board of Directors.

25. The fund, in accordance with the Law on the Fund, forms a unified policy for companies and approves methodological recommendations and corporate standards for organizations. Such areas include management of human resources, information technologies, investments, innovations, risk management, corporate governance, planning, economics and finance, and others. Holding companies may adopt a single policy for their group for areas not covered by the fund's corporate standards or supplementing/detailing the fund's policies and corporate standards.

The decision to apply the corporate standards approved by the Fund in the field of internal audit and internal control system in the organization is made by the Board of Directors of the organization, considering the compliance of these standards with the specifics of the organization's activities.

27. It is recommended to ensure an optimal asset structure for the fund organizations. In a holding company, the parent company may be established in the form of a joint stock company. It is preferably recommended to establish other organizations in the organizational-legal form of a limited liability partnership. In organizations already established in the form of a joint stock company, it is recommended to consider the possibility of reorganization in the form of a limited liability partnership, taking into account economic, legal and other aspects and ensuring the interests of the fund group.

Establishment of new organizations in the form of a joint stock company is allowed in exceptional cases, such as the planned further sale of the organization's shares on the stock market.

When establishing an organization in the form of a limited liability partnership, the participants independently decide on the necessity of establishing supervisory boards and the expediency of electing independent members to it, depending on the scale and specifics of the activities of the organization to be established.

Asset portfolio management, including the determination of the shareholding when acquiring new assets and/or selling shares of organizations, is carried out in accordance with the strategic objectives established in the fund's development plan and the fund's investment policy approved by the Board of Directors of the fund.

Issues related to the development and implementation of the development plan are considered at intervals determined by the Board of Directors, but at least once a year, exclusively at in-person meetings of the Board of Directors. The Board of Directors implements a system of early identification and timely response to changes in domestic and external market conditions, force majeure situations

Bodies, officials and employees of the fund and organizations act and make decisions in accordance with the development plan and the charter. The development plan is a long-term document defining the vision, mission, goals, objectives, strategic directions and key performance indicators for a ten-year period.

31. The development plan of a holding company should contain goals, objectives and directions of development of the organizations included in its group. Holding group organizations whose shares are already listed on stock exchanges, as well as holding group organizations established in the form of joint ventures, adopt individual development plans. In the above organizations, the provisions of the organizations' charters and consultations with other shareholders (participants) should be used to develop a development plan.

As part of the development plan, the Board of Directors determines long-term goals that must meet the following criteria: specific, measurable, achievable, relevant, and with a set timeframe for achievement. The assessment of achievement of the strategic objectives is determined through long-term KPIs. It is recommended that individual areas of activity (e.g. investment, innovation, information technology, human resource management) be included in the development plan.

32. In the process of development and monitoring of the development plan implementation, the Board of Directors and the executive body hold strategic sessions during which the main activities, tasks, problematic issues, risks, and corrective measures are discussed.

Key stakeholders, such as major shareholders, key business partners, and interested government agencies are consulted in the development of the development plan.

The development plan provides goals, objectives and indicators in terms of sustainable development.

The list and target values of the company's KPIs are approved by the Board of Directors of the company.

In order to achieve KPIs, companies develop appropriate development plans.

34. The achievement of KPIs of the fund and organizations against the approved development plan is assessed on an annual basis. This assessment affects the remuneration of the CEO and members of the executive bodies, is considered in their re-election, and is also the basis for their early dismissal.

In order to assess the achievement of the goals and objectives set out in the development plan, companies are set KPIs through the following processes:

5) the company's development plan is approved by the company's Board of Directors and then the approved version of the development plan is also entered into the fund's information system for planning, monitoring and evaluation of activities.

Adjustment of company development plans after their initial approval is allowed in accordance with the procedure determined by the relevant documents of the fund. A draft company development plan and a draft adjustment to an approved company development plan shall not be coordinated by the fund.

35. The executive body of a company monitors the implementation of the development plan and the company's KPIs; the monitoring results and reports on implementation of the development plan are entered into the fund's information system for planning, monitoring and performance evaluation in accordance with the procedure determined by the relevant documents of the fund.
